TV Ad #1	Global Block/Unblock By Ratings By Time By Channel By Time Allowance By S Allowance Set Passwords	
TV Ad #2		

X digit numeric Passwords may be set for up to 4 users. A password is inputted using the digit keys and is not set until it is typed in a second time in the Confirm box. The user with the most restrictive Ratings/Content settings is automatically set as the default. This user's settings will be used when the TV is turned on. The Master may select another default user after correctly inputting their password on the screen. User names can be inputted by pressing the Blue "Alpha" action button and then using the up/down keys to scroll through the alphabet. Once finished, the Blue action button labeled "Finish" may be pressed to enter the alpha name into the password database. Subsequently, when the user correctly enters their password, the Blue action button label changes to "Change" and the user may enter a new password. The Green action button clears the password or alpha inputs and lets the user start again.

The "Master" may block a selected user's access by ratings or content codes. A user is selected, the Password list turns green when the Password is accepted allowing access to the Ratings/Content list. The user simply highlights a rating or content code and presses the Blue action button to block (the turns red) or unblock (the is green). Pressing the Green action button clears all settings on the screen. Changes are accepted when the user leaves the screen by scrolling to the Menu bar. The "By Ratings" list on the first level V-CHIP+ menu turns RED to indicate Ratings Blocking has been set.
